## Executive Summary

This document outlines revisions to the Victorian Health Incident Management System minimum dataset (VHIMS MDS) for 2024–25. Revisions were confirmed in March 2024, following consultation and feedback from health services<sup>1</sup>, vendors and relevant policy and program areas of the Department of Health (the department) and Safer Care Victoria (SCV).

Revisions to the VHIMS MDS for 2024–25 comprise additions and removals, as well as amendments to existing data items (see Table 1). Health services are required to commence reporting the VHIMS MDS 2024–25 by 1 April 2025.

Table 1 Revisions to VHIMS MDS 2024–25

Confirmed revisions – VHIMS MDS 2024–25		
	Data element	Confirmed change
AMENDMENT TO EXISTING DATA ELEMENTS	<i>Notification type</i>	Rename to <i>Incident type</i> and include 'OHS (Visitor)' type in VHIMS MDS manual (data element already transmitted to VAHI).
	<i>Incident type/Event type and Incident Type subcategories</i>	Amend the VHIMS MDS event taxonomy to improve clarity and utility.
	<i>Related to care provided by this organisation</i>	Rename <i>Clinical incident flag</i> . Update to definition to align with Safer Care Victoria <i>Adverse Patient Safety Event (APSE) Policy</i> .
	<i>Incident Severity Rating (ISR) algorithm (clinical incidents only)</i>	Update the ISR algorithm for clinical incidents and amend related fields
	<i>Contributing factors</i>	Modify <i>Contributing factors</i> code set to align with contributing factors used by Safer Care Victoria for Sentinel Event reporting.
	<i>If yes, what type of emergency response?</i>	Amend <i>If yes, what type of emergency response?</i> field name to <i>Type of emergency response</i> . Include an item to <i>Emergency Response Type</i> identifying <i>No emergency code reported</i> Additional items to the <i>Type of Emergency Response</i> list (Code Grey [Planned]; Code Grey [Unplanned])
	<i>Sentinel event</i>	Include validation to only report <i>Sentinel event</i> for ISR 1 and 2 incidents.

<sup>1</sup> See *Summary of feedback to proposals for revisions to Victorian Health Incident Management System Minimum Data set (VHIMS MDS) for 2024–25*

<b>ADDITION OF NEW DATA ELEMENT</b>	<b>Data element</b>	<b>Proposed change</b>
	<i>Health service incident ID</i>	Introduce new Health service incident ID (health service generated) to support reconciliation of incidents.
	<i>Adverse patient safety event flag</i>	Introduce a new flag to identify if the reported clinical incident is an Adverse Patient Safety Event (APSE).
	<i>DH Campus</i>	Introduce new field <i>DH Campus</i> aligning Campus codes reported with those used in the Victorian Department of Health administrative health data collections.
	<i>Ward/location Type</i>	Introduce a new field with a standard list of values called <i>Ward/location Type</i> .
	<i>Speciality unit Type</i>	Introduce a new field with a standard list of values called <i>Specialty unit Type</i> .
	<i>Indigenous status</i>	Introduce <i>Indigenous status</i> element to enable demographic analysis of incidents.
	<i>Emergency response outcome</i>	Introduce <i>Emergency response outcome</i> field to align with Department's Code Grey Standards.
<b>REMOVAL OF EXISTING DATA ELEMENT</b>	<b>Data element</b>	<b>Proposed change</b>
	<i>'Is this incident related to a pandemic/epidemic?'</i>	Remove requirement to report this element.
	<i>Campus</i>	Remove requirement to report this item
	<i>Ward Location</i>	Remove requirement to report this item
	<i>Specialty Unit</i>	Remove requirement to report this item
	<i>Was an emergency response called?</i>	Remove <i>Was an emergency response called?</i>
	<i>External notifications</i>	Remove requirement to report this element.
	<i>VMIA notifiable</i>	Remove requirement to report this element.
	<i>Related National Safety and Quality Health Service Standard</i>	Remove requirement to report this element.
<i>If 'Other' describe other sentinel event</i>	Remove requirement to report this item	

# Introduction

The Victorian Health Incident Management System Minimum Data Set (VHIMS MDS) is a standardised dataset for the collection and classification of clinical, occupational health and safety (OH&S) incidents (also known as adverse events), near misses, and hazards.

Incident data has been collected in Victoria since 2009. In 2018, a minimum dataset for health incidents, the VHIMS MDS was agreed and all Victorian public health and community service organisations that provide services on behalf of the Department of Health (the department) were required to commence reporting the MDS by 30 June 2022.

The VHIMS MDS will undergo a periodic review and change process to ensure that the collection continues to meet the needs of stakeholders. Based on stakeholder feedback over the first 12–18 months of data collection, the review of the VHIMS MDS for 2024–25 focused on refining the dataset and business rules to improve data quality and utility and reduce the reporting burden on health services.

Following consultation with health services, vendors and policy and program areas of the department and Safer Care Victoria (SCV), a total of 23 changes comprising addition, deletion, and amendment of data items, have been confirmed and are outlined below.

From 1 April 2025, Victorian health services are required to collect and transmit in accordance with these revised specifications and reporting timeframes set out in the department's *Policy and Funding Guidelines*.

The revisions set out in this document are complete at the date of publication. If further changes are required during the year, these will be advised.

An updated VHIMS MDS 2024–25 manual will be available in August 2024.

## Orientation to this document

New data elements are marked as (NEW).

Amended data elements are marked as (AMENDED)

Changes are shown under the appropriate manual section headings (see example below)

Removals are shown with a ~~strike-through~~.

## Section 3 Data definitions (example)

Specifications	
<b>Definition</b>	A concise statement that expresses the essential nature of the data element and its differentiation from other data elements.
<b>Label</b>	Provides the database label for the data element for data users
<b>Form</b>	The format in which the data is recorded. This may include: <ul style="list-style-type: none"> <li>• code (for pre-determined code sets) - may be organisation dependent.</li> <li>• date</li> <li>• free text</li> <li>• system-generated</li> </ul>
<b>Layout</b>	The layout of characters for the data element, expressed by a character string representation,

<b>Reported by</b>	Criteria for reporting data element
<b>Reported For</b>	The specific circumstances when this data element must be reported.
<b>Reported When</b>	The stage in the data submission cycle when this data element is reported.
<b>Code set</b>	The set of valid values for the data element.
<b>Reporting Guide</b>	Additional comments or advice on reporting the data item.
<b>Validations</b>	A list of validations that relate to this data element.
<b>Related Elements</b>	Other data items that relate to this data item.
<b>Administration</b>	
<b>Purpose</b>	The main reason/s for the collection of this data item.
<b>Principal Data Users</b>	Identifies the primary user/s of the data collected.
<b>Collection Start</b>	The year the collection of this data item commenced.
<b>Version History</b>	Provides information regarding modifications made to the data element. Listed are a version number, beginning with 1 and incremented by 1 for each subsequent revision as well as an effective date, describing the date the modification came into effect.
<b>Definition Source</b>	Identifies the authority that defined this data item.
<b>Code Set Source</b>	Identifies the authority that developed the code set for this data item.

# Data element changes

## ~~Is this incident Related to the pandemic/epidemic?~~

### Section 3 Data definitions

#### ~~Is this incident related to the pandemic/epidemic?~~

<b>Specifications</b>	
<b>Definition</b>	<del>This question is to determine whether an incident being reported is related to a pandemic/epidemic such as a COVID-19 hazard or non-person related event.</del>
<b>Form</b>	Code
<b>Reported by</b>	<del>All Victorian public health services and all services under their governance structure including community health and bush nursing centres.</del>
<b>Reported For</b>	<del>All incidents (clinical and OH&amp;S), near misses, and hazards.</del>
<b>Reported When</b>	<del>Any of the above record types is reported.</del>
<b>Code set</b>	Yes No
<b>Reporting Guide</b>	<p><del>Enables analysis of incidents related to a pandemic/epidemic (not specific to COVID-19).</del></p> <p><del>Select yes if the incident and contributing factors were related to a pandemic/epidemic (e.g. COVID-19).</del></p> <p><del>If the response to this question is Yes, the 'Details field' must outline how the pandemic/epidemic has contributed to the incident. Some examples could be, aggression from a visitor because of visitor restrictions, patient to staff transmission or supplies such as PPE are not available.</del></p>
<b>Validations</b>	<del>General edits only</del>
<b>Related Elements</b>	<del>N/A</del>
<b>Administration</b>	
<b>Purpose</b>	<del>To monitor the prevalence of incidents related to a pandemic/epidemic.</del>
<b>Principal Data Users</b>	<del>Victorian Agency for Health Information, Department of Health, Safer Care Victoria.</del>
<b>Collection Start</b>	<del>2019-20</del>
<b>Definition Source</b>	<del>Department of Health</del>
<b>Code Set Source</b>	<del>Department of Health</del>

## Health service incident ID (NEW)

### Section 3 Data definitions

#### Health service incident ID (New)

Specifications					
<b>Definition</b>	An identifier (number or code) unique to each incident within an organisation. The identifier is generated by the health service incident management software and is used to identify an incident record.				
<b>Label</b>	HSIncidentID				
<b>Form</b>	Identifier code (system generated)	Repeats:	Min	Max	Duplicate
			1	1	N/A
<b>Layout</b>	X (1-226)	Size	Min	Max	
			1	226	
<b>Reported by</b>	All Victorian public health services and all services under their governance structure including community health and bush nursing centres reporting via the VHIMS API.				
<b>Reported For</b>	All records.				
<b>Reported When</b>	Reported at transmission of new incident.				
<b>Code set</b>	Organisation generated. Individual sites may use their own alphabetic, numeric or alphanumeric coding system.				
<b>Reporting Guide</b>	<p>This code should be unique within the organisation for each incident. Health services that change vendors must ensure that their new software does not duplicate values sent from their previous system.</p> <p>It is permissible to use upper case or lower-case ASCII alpha characters, digits 0 to 9, dashes, spaces or apostrophes. That is, ASCII hexadecimal values 20, 27, 2D, 41 through 5A inclusive, 61 through 7A inclusive. Identifiers are not case-sensitive.</p>				
<b>Validations</b>	<i>Health service incident ID</i> is mandatory for all incidents at first transmission (API only).				
<b>Related Elements</b>	<i>Organisation</i>				
Administration					
<b>Purpose</b>	Enables reconciliation of reported incidents between the department and health service systems.				
<b>Principal Data Users</b>	Safer Care Victoria and Department of Health				
<b>Collection Start</b>	2024–25				
<b>Definition Source</b>	Department of Health				

<b>Code Set Source</b>	System generated (health service software).
------------------------	---

## Section 4 Business rules

Health service incident identifier (HS IncidentID) is required when transmitting new incidents.

## Section 6 Validations

400- xxx Health Service Incident Identifier not present

Problem: A health service incident identifier (HSIncidentID) was not provided

Solution: Ensure HSIncidentID is included in submission.

## Notification Incident type (AMEND)

### Section 3 Data definitions

#### Notification Incident type (Amend)

Specifications					
<b>Definition</b>	A classification of incident based on who was harmed, or could have been harmed, by the incident.				
<b>Form</b>	String	Repeats:	Min	Max	Duplicate
			1	1	N/A
<b>Layout</b>	XXX	Size	Min	Max	
			1	N/A	
<b>Reported by</b>	All Victorian public health services and all services under their governance structure including community health and bush nursing centres.				
<b>Reported For</b>	All records.				
<b>Reported When</b>	Reported at transmission of new incident.				
<b>Code set</b>	clinical ohs-staff ohs-visitor hazard				
<b>Reporting Guide</b>	<p><b>clinical – Clinical Incidents-</b> records where the individual who would be harmed or potentially harmed is a patient client resident of consumer.</p> <p><b>ohs-staff – Occupational Health and Safety – Staff Incidents-</b>records where the individual harmed or potentially harmed is an employee, contractor, or volunteer of the organisation.</p> <p><b>ohs-visitor – Occupational Health and Safety – Visitor Incidents -</b> records where the individual harmed or potentially harmed was a visitor to the health service or a member of the public in a community setting.</p>				

	<p><b>hazard – Hazard Incidents</b> – records where no identifiable individual was harmed but where an individual or group of individuals could have been harmed as a result of the situation.</p> <p>For API transmitting health services. Incident Type is a query parameter included in the GET/api-base-uri/v1/resource which will return the reference data in an array format for the given incident type and the point in time.</p> <p>See <i>Section 5: API Specifications</i></p>		
<b>Validations</b>	<i>Incident type</i> is mandatory for all incidents at first transmission.		
<b>Related Elements</b>	Multiple elements - <i>Incident type</i> is important in determining the elements that need to be reported.		
<b>Administration</b>			
<b>Purpose</b>	Enables identification of the type of incident for review, analysis, monitoring and reporting.		
<b>Principal Data Users</b>	Safer Care Victoria and Department of Health		
<b>Collection Start</b>	2019–20		
<b>Version History</b>	Version	Previous Name	Effective Date
	1	Notification Type	2024–25
<b>Definition Source</b>	Department of Health		
<b>Code Set Source</b>	Department of Health		

## DH Campus (New)

### Section 3 Data definitions

#### Campus

<b>Specifications</b>	
<b>Definition</b>	Campus ID of where the incident occurred at the health service.
<b>Form</b>	Organisation dependent code.
<b>Reported by</b>	All Victorian public health services and all services under their governance structure including community health and bush nursing centres.
<b>Reported For</b>	All incidents (clinical and OH&S), near misses, and hazards.
<b>Reported When</b>	Any of the above record types is reported.
<b>Code set</b>	Organisation dependent code.
<b>Reporting Guide</b>	Report the incident under the Campus ID at which the incident occurred.
<b>Validations</b>	General edits only,
<b>Related Elements</b>	N/A
<b>Administration</b>	

<b>Purpose</b>	Enables identification of the campus where the incident occurred. This will enable analysis at a more granular level for health services with more than one campus/site.
<b>Principal Data Users</b>	Victorian Agency for Health Information, Department of Health, Safer Care Victoria.
<b>Collection Start</b>	2019–20
<b>Definition Source</b>	VAMI
<b>Code Set Source</b>	Organisation dependent

### DH Campus (New)

Specifications				
<b>Definition</b>	Code identifying the health service campus where the incident occurred, or the health service campus responsible for clinical governance processes related to the incident.			
<b>Form</b>	Alpha Numeric Code	Repeats:	Min	Max
			1	1
				Duplicate
				N/A
<b>Layout</b>	X (1-10)	Size	Min	Max
			1	10
<b>Reported by</b>	All Victorian public health services and all services under their governance structure including community health and bush nursing centres.			
<b>Reported For</b>	All records.			
<b>Reported When</b>	Reported at transmission of new incident.			
<b>Code set</b>	Campus code list (see Section 7 Code Set List)			
<b>Reporting Guide</b>	Incidents created in VHIMS MDS 2024-25 must report a campus code from the Campus Code List.			
<b>Validations</b>	<i>Campus code</i> is dependent on <i>Organisation</i> . <i>Campus code</i> is mandatory for all incidents at first transmission.			
<b>Related Elements</b>	<i>Organisation</i>			
Administration				
<b>Purpose</b>	Enables identification of the responsible health service campus for review, analysis, monitoring and reporting.			
<b>Principal Data Users</b>	Safer Care Victoria and Department of Health			
<b>Collection Start</b>	2024–25			
<b>Definition Source</b>	Department of Health			
<b>Code Set Source</b>	Department of Health			

## Section 7 Code set lists.

Campus list to be provided with VHIMS MDS Manual.

## Ward/location type (NEW)

### Section 3 Data definitions

#### Ward/location

Specifications	
<b>Definition</b>	Ward/location ID where the incident occurred.
<b>Form</b>	Organisation dependent code.
<b>Reported by</b>	All Victorian public health services and all services under their governance structure including community health and bush nursing centres.
<b>Reported For</b>	All incidents (clinical and OH&S), near misses, and hazards.
<b>Reported When</b>	Any of the above record types is reported.
<b>Code set</b>	Organisation dependent code.
<b>Reporting Guide</b>	<p>Each health service maintains a list of physical locations unique to their campuses. All new wards and locations require a code supplied by VAHI.</p> <p>To lessen the burden on health services, from 1 July 2023 health services requesting new VAHI codes for wards will be given a single "other" ward code that can be used in transmissions to the department.</p> <p>Health services should work with vendors to ensure a unique lists of ward/location codes can be maintained in their system, while transmitting the single code to VAHI.</p>
<b>Validations</b>	<i>General edits only</i>
<b>Related Elements</b>	N/A
Administration	
<b>Purpose</b>	Enables identification of the type of location where the incident occurred, for review, analysis, monitoring and reporting.
<b>Principal Data Users</b>	Victorian Agency for Health Information, Department of Health, Safer Care Victoria.
<b>Collection Start</b>	2019-20
<b>Definition Source</b>	VAHI
<b>Code Set Source</b>	Organisation dependent

#### Ward/location type (New)

Specifications
----------------

<b>Definition</b>	Code identifying the type of place where the incident occurred, or where the hazard was identified.				
<b>Form</b>	Integer	Repeats:	Min	Max	Duplicate
			1	1	N/A
<b>Layout</b>	X (1-10	Size	Min	Max	
			1	10	
<b>Reported by</b>	All Victorian public health services and all services under their governance structure including community health and bush nursing centres.				
<b>Reported For</b>	All records.				
<b>Reported When</b>	Reported at transmission of new incident.				
<b>Validations</b>	<i>Ward/location type</i> is mandatory for all incidents at first transmission.				
<b>Related Elements</b>	N/A				
<b>Code set</b>	Ward/location type code list (see Section 7 Code set list)				
<b>Reporting Guide</b>	All <i>Ward/location type</i> codes transmitted to VHIMS for incident created in VHIMS MDS 2024–25 must use a <i>Ward/location type</i> code from the <i>Ward/location type</i> code set list.				
<b>Administration</b>					
<b>Purpose</b>	Enables identification of the type of location where the incident occurred, for review, analysis, monitoring and reporting.				
<b>Principal Data Users</b>	Safer Care Victoria and Department of Health				
<b>Collection Start</b>	2024–25				
<b>Definition Source</b>	Department of Health				
<b>Code Set Source</b>	Department of Health				

## Section 7 Code list

[Ward/Location type code set list](#)

## Specialty unit type (NEW)

### Section 3 Data definitions

### Specialty Unit

<b>Specifications</b>	
<b>Definition</b>	The department/specialty/unit ID responsible for following up the incident
<b>Form</b>	

<b>Reported by</b>	All Victorian public health services and all services under their governance structure including community health and bush nursing centres.		
<b>Reported For</b>	All incidents (clinical and OH&S), near misses, and hazards.		
<b>Reported When</b>	Any of the above record types is reported.		
<b>Code set</b>	Organisation dependent code.		
<b>Reporting Guide</b>	<p>Each health service maintains a list of physical locations unique to their campuses. All new wards and locations require a code supplied by VAHI.</p> <p>To lessen the burden on health services, from 1 July 2023 health services requesting new VAHI codes for wards will be given a single "other" ward code that can be used in transmissions to the department.</p> <p>Health services should work with vendors to ensure a unique lists of ward/location codes can be maintained in their system, while transmitting the single code to VAHI.</p>		
<b>Validations</b>	General edits only, see Section 1: Introduction — Data quality statement.		
<b>Related Elements</b>	N/A		
<b>Administration</b>			
<b>Purpose</b>	Enables assessment of whether there are trends for specific locations in health services.		
<b>Principal Data Users</b>	Victorian Agency for Health Information, Department of Health, Safer Care Victoria.		
<b>Collection Start</b>	2019-20		
<b>Version history</b>	<b>Version</b>	<b>Previous name</b>	<b>Effective Date</b>
	4	Ward/location	1/7/2023
<b>Definition Source</b>	VAHI		
<b>Code Set Source</b>	Organisation dependent		

### Specialty unit type (NEW)

<b>Specifications</b>				
<b>Definition</b>	The type of specialty unit or community health program responsible for the care of the impacted patient/client/consumer/resident, or the specialty unit, community health program or non-care related function, where the impacted staff member was undertaking their role.			
<b>Form</b>	Code	Repeats:	Min	Max
			1	1
<b>Layout</b>	X (1-10)	Size	Min	Max
			1	226
<b>Reported by</b>	All Victorian public health services and all services under their governance structure including community health and bush nursing centres.			
<b>Reported For</b>	All records.			

<b>Reported When</b>	Reported at transmission of new incident.
<b>Code set</b>	Specialty unit type code list (see Section 7- Code set list)
<b>Reporting Guide</b>	<p>All <i>Specialty unit type</i> codes transmitted to VHIMS for incident created in VHIMS MDS 2024–25 must use a Specialty unit type code from the Specialty unit type code set list.</p> <p><b>Clinical Incidents:</b> The type of specialty unit that is responsible for the care of the patient/client/resident/consumer that is harmed in the incident, often a medical specialty or a funded program.</p> <p><b>OH&amp;S and Hazard Incidents:</b> The type of specialty unit, community health program or non-care related activity which takes place where the staff member was impacted, often a medical specialty, workgroup or function, or a funded program.</p>
<b>Validations</b>	<i>Specialty unit type</i> is mandatory for all incidents at first transmission.
<b>Related Elements</b>	
<b>Administration</b>	
<b>Purpose</b>	Enables identification of impacted patient/workforce population for review, analysis, monitoring and reporting.
<b>Principal Data Users</b>	Safer Care Victoria and Department of Health
<b>Collection Start</b>	2024–25
<b>Definition Source</b>	Department of Health
<b>Code Set Source</b>	Department of Health

## Section 7 Code list

[Specialty unit list code set list.](#)

## Changes to Event type and Event type subcategories (multiple)

### Section 3 Data definitions

Specifications					
<b>Definition</b>	A descriptor classifying the cause of harm that occurred, or could have occurred, as a result of the incident.				
<b>Form</b>	Code				
<b>Form</b>	Code	Repeats:	Min	Max	Duplicate
			1	1	N/A
<b>Layout</b>	X				
			1		

<b>Reported by</b>	All Victorian public health services and all services under their governance structure including community health and bush nursing centres.
<b>Reported For</b>	All records. <del>Incident types</del>
<b>Reported When</b>	<del>Reported for all new and updated incidents</del> Reported at transmission of new incident.
<b>Code set</b>	The VHIMS 2 taxonomy for incident classification will be used. There are three broad categories, further broken down as follows: <ul style="list-style-type: none"> <li>• 25 clinical incident types.</li> <li>• 13 OH&amp;S incident types.</li> <li>• 79 non-person or hazard event types.</li> </ul> See Section 7 Code list for full code set for clinical, OH&S, and hazard incident/event types.
<b>Reporting Guide</b>	The event type classification determines the additional information (known as event type subcategories) required to further describe the cause of the incident (i.e. process/type, problem, and related questions).  The event type taxonomy is unique to incident type, i.e. clinical incident event type taxonomy cannot be used to classify an OH&S incident.  <del>The event type selected will determine the additional questions required to be answered.</del> The event types have been 'tagged' with associated key words to improve consistency.  <del>Note there is no longer a distinction between primary and related incident types.</del>
<b>Validations</b>	Multiple event types are allowable for each incident.  At least one <i>Event type</i> is mandatory for all incidents at first transmission.  <del>Incident type/Event type</del> is dependent on <del>Notification Incident type</del> .
<b>Related Elements</b>	<i>Incident type</i>  <i>Event type sub-categories</i> (type problem, process and related questions)
<b>Administration</b>	
<b>Purpose</b>	<del>Enables more reliable and accurate analysis using incident type.</del> Enables classification of incidents into categories, for review, analysis, monitoring and reporting.
<b>Principal Data Users</b>	Safer Care Victoria and Department of Health
<b>Collection Start</b>	2019–20
<b>Definition Source</b>	Department of Health
<b>Code Set Source</b>	Department of Health

## Section 7 Code lists

Multiple changes have been made to the event and event subcategory types these changes are outlined in the [Event taxonomy code list](#). A summary of changes is listed below.

5.2.1 – Add *Discharge* process and associated problems within Assessment & Care Planning Event type.A

5.2.2 – Amend behaviour problem within Behaviour Event type. There has been a change to the language used for sexual safety behaviour problems bringing it in line with policy. The changes incorporate the descriptions and definitions outlined in the Chief Psychiatrists reporting directive<sup>2</sup>.

5.2.3 – Amend type of restraint within Behaviour. Change the language of restraint to restrictive intervention. Change of items in the list of type of restrictive interventions, previously restraint and allow multiple restraint types to be selected.

5.2.4 – Remove Seclusion as an event type but retain it as a question within the behaviours event type

5.2.5 – Amendments within Blood Products including allowing selection of more than one Blood Products type add additional blood product types and an additional problem.,

5.2.6 – Additional problems within Deteriorating Patient

5.2.7 – Additional Fall types within *Fall event type*

5.2.8 – Amendments and additions to problems associated with the testing/sampling process within Investigations Event type

5.2.9 – Remove 'Did this involve a high risk (PINCH) medication.'

5.2.10 – Amend medication details within the Medication and IV fluids and Medication Management. Change the AMT level reported for Generic and Brand Name and remove the requirement to report Medication Class.

5.2.11 – Amend problems within Medication and IV fluids.

5.2.12 – Remove duplicate problem within Hazard Medication Management event types.

5.2.13 – Amend behaviour problem types within OH&S Aggression/behaviour event types.

5.2.15 – Remove problem types within OH&S Fall, Slip, Trip event type.

## ~~Was an Emergency Response Called?~~

### ~~Was an Emergency Response Called?~~

<b>Specifications</b>					
<b>Definition</b>	Flag that indicates if an emergency response was called for the reported incident				
<b>Form</b>	Identifier code	Repeats:	Min	Max	Duplicate
			1	1	N/A
<b>Layout</b>	X	Size	Min	Max	
			1	1	
<b>Reported by</b>	All Victorian public health services and all services under their governance structure including community health and bush nursing centres.				
<b>Reported For</b>	All incident types.				

<sup>2</sup> [Sexual safety | health.vic.gov.au](https://sexualsafety.health.vic.gov.au)

<b>Reported When</b>	Reported for all incidents
<b>Code set</b>	Yes, No
<b>Reporting Guide</b>	Yes: Reported if an emergency response was called for the reported incident  No: Reported where no emergency response was required for the reported incident
<b>Validations</b>	Element is mandatory for all incident types when <i>Date closed</i> is present and where <b>yes</b> is reported <i>Type of Emergency Response</i>
<b>Related Elements</b>	<i>Type of emergency response</i> <i>Emergency response outcome</i> <i>Date closed</i>
<b>Administration</b>	
<b>Purpose</b>	To provide important information to Department of health for monitoring the quality and safety of patient, client resident, staff and visitors to Victoria's health services particularly monitoring of aggression and violence in health services <a href="#">code grey standards sep 2017.pdf.pdf (health.vic.gov.au)</a>

## Emergency response outcome (NEW)

### Section 3 Data definitions

#### Emergency response outcome (New)

Specifications					
<b>Definition</b>	The outcome of a code grey response as described in the Code Grey Standards ( <a href="https://www.health.vic.gov.au/code-grey-standards-sep-2017-pdf.pdf">code-grey-standards-sep-2017-pdf.pdf (health.vic.gov.au)</a> ).				
<b>Form</b>	Identifier code	Repeats:	Min	Max	Duplicate
			1	1	N/A
<b>Layout</b>	X	Size	Min	Max	
			1	1	
<b>Reported by</b>	All Victorian public health services and all services under their governance structure including community health and bush nursing centres.				
<b>Reported For</b>	All incidents where a Code grey (planned) or Code grey (unplanned) emergency response type was reported.				
<b>Reported When</b>	Reported at any time in process of incident review.				
<b>Code set</b>	<p>1 No violence or aggression occurred.</p> <p>2 Situation resolved prior to code grey arrival.</p> <p>3 Clinically led Code Grey response implemented.</p> <p>4 Security only response</p>				
<b>Reporting Guide</b>	If a Code Black response is initiated as the outcome of a Code Grey Response, the record should be reported as a Code Black.				
<b>Validations</b>	Element is mandatory for all incident types when <i>Date closed</i> is present and <i>Type of emergency response</i> is reported as Code Grey (unplanned) or Code Grey (planned).				
<b>Related Elements</b>	<p><i>Emergency Response Flag</i></p> <p><i>Type of emergency response</i></p> <p><i>Date closed</i></p>				
Administration					
<b>Purpose</b>	Provides important information to Department of Health for monitoring the quality and safety of patient, client resident, staff and visitors to Victoria's health services particularly monitoring of aggression and violence in health services in accordance with Code Grey Standards <a href="https://www.health.vic.gov.au/code-grey-standards-sep-2017-pdf.pdf">code-grey-standards-sep-2017-pdf.pdf (health.vic.gov.au)</a> .

## Clinical incident flag (NEW)

### Section 3 Data definitions

#### Clinical incident flag (New)

Specifications					
<b>Definition</b>	An identifier that the incident reported is confirmed as a clinical incident, (i.e. unintended or unnecessary harm has occurred while the affected person was receiving clinical care).				
<b>Form</b>	Identifier code	Repeats:	Min	Max	Duplicate
			1	1	N/A
<b>Layout</b>	X	Size	Min	Max	
			1	1	
<b>Reported by</b>	All Victorian public health services and all services under their governance structure including community health and bush nursing centres.				
<b>Reported For</b>	Clinical incident records.				
<b>Reported When</b>	Reported at any time in process of clinical incident review.				
<b>Code set</b>	Yes  No				
<b>Reporting Guide</b>	<b>Yes:</b> Reported where the record is confirmed to be a clinical incident, i.e. unintended or unnecessary harm has occurred while the affected person was receiving clinical care.				

	All clinical incident records should be considered a confirmed clinical incident unless the record specifically meets exclusion criteria. <b>No:</b> Reported where the record is not a clinical incident.		
<b>Validations</b>	<i>Clinical incident flag</i> is mandatory for clinical incidents when <i>Date closed</i> is present.		
<b>Related Elements</b>	<i>Incident type</i> <i>Adverse patient safety event (APSE) flag</i> <i>Date closed</i>		
<b>Administration</b>			
<b>Purpose</b>	Enables identification of non-incident clinical records, enabling these to be excluded from MDS reporting.		
<b>Principal Data Users</b>	Safer Care Victoria and Department of Health		
<b>Collection Start</b>	2019–20		
<b>Version History</b>	Version	Previous Name	Effective Date
	1	Is this related to care in this organisation?	2024–25
<b>Definition Source</b>	Safer Care Victoria

## Adverse patient safety event (APSE) flag (NEW)

### Section 3 Data definitions

#### Adverse patient safety event (APSE) flag (New)

Specifications				
<b>Definition</b>	An identifier that an adverse patient safety event has occurred (i.e. treatment and/or care did not go as intended or expected).			
<b>Form</b>	Identifier code	Repeats:	Min	Max
			1	1
<b>Layout</b>	X	Size	Min	Max
			1	1
<b>Reported by</b>	All Victorian public health services and all services under their governance structure including community health and bush nursing centres			
<b>Reported For</b>	Clinical incident records where the <i>Clinical incident flag</i> is reported as yes.			
<b>Reported When</b>	Reported at any time in process of clinical incident review.			
<b>Code set</b>	Yes No			

<b>Reporting Guide</b>	Only reported for clinical incident records where the <i>Clinical Incident flag</i> is set to Yes. <b>Yes:</b> Reported where the incident is an adverse patient safety event. Yes, should be reported if clinical incident has been confirmed, and treatment or care provided <b>did not</b> go as intended and as expected. <b>No:</b> Reported where incident is not considered an APSE.
<b>Validations</b>	<i>APSE flag</i> is mandatory when <i>Date closed</i> is present and when the <i>Clinical incident flag</i> is reported as yes.
<b>Related Elements</b>	<i>Incident type</i> <i>Clinical incident flag</i> <i>Date closed</i>
<b>Administration</b>	
<b>Purpose</b>	Enables distinction between APSE and non-APSE clinical incidents to support incident review, analysis, monitoring and reporting.
<b>Principal Data Users</b>	Safer Care Victoria and Department of Health
<b>Collection Start</b>	2024-25
<b>Definition Source</b>	Safer Care Victoria; Adverse Patient Safety Event (APSE) policy
<b>Code Set Source</b>	Department of Health

## Incident Severity Rating (AMEND)

### Section 2 Concepts and derived items

**Definition** Incident Severity Rating (ISR) is a four-tiered rating system from 1 (most severe) to 4 (least severe) which determines the level of impact that resulted from, or could have resulted from, a reported incident. ISR is derived for clinical, OH&S (staff and visitor) and hazard incidents from responses provided for three VHIMS MDS elements.

**Guide for use** The Incident Severity Rating algorithm and the reported elements vary according to the Incident type.

**Clinical Incidents:** In VHIMS MDS 2024-25 changes have been made to the algorithm for clinical incidents to ensure better alignment with Safer Care Victoria and Department of Health policy. The new algorithm utilises three questions *Level of harm*, *Duration of harm* and *Level of care/treatment*.  
Comprehensive

Clinical guidance documents are being developed and will be available as an appendix to the VHIMS MDS manual to assist implementation at Health Services.

Clinical incidents reported in previous versions of the VHIMS MDS should be reported using the previous algorithm which used the responses to *Level of harm*, *Level of treatment* and *Level of care*.

**OHS Incidents (Staff and Visitor):** The ISR algorithm utilises responses to three question *Level of harm sustained*, *Required level of care* and *Actions required*.

**Hazard Incidents:** The ISR algorithm for hazards utilises the responses to three questions *Level of impact*, *Level of disruption to services* and *Level of intervention required*.

The ISR Algorithm mapping is included at [Section 7 Code Set List](#)

## Level of harm clinical (NEW)

### Section 3 Data definitions

#### Level of harm clinical (New)

Specifications					
<b>Definition</b>	The severity of harm that the affected person experienced.				
<b>Form</b>	Identifier code	Repeats:	Min	Max	Duplicate
			1	1	N/A
<b>Layout</b>	XX (1-226)	Size	Min	Max	
			1	226	
<b>Reported by</b>	All Victorian public health services and all services under their governance structure including community health and bush nursing centres.				
<b>Reported For</b>	Clinical incident records.				
<b>Reported When</b>	Reported at transmission of new incident. Can be amended throughout the process of incident review until closure.				
<b>Code set</b>	50 – Death 51 - Serious Sexual Safety Event 52 - Severe 53 - Moderate 54 - Minor 55 - No Harm				
<b>Reporting Guide</b>	Only reported for clinical incident records. Comprehensive clinical guidance on reporting ISR elements is provided in the VHIMS Data Manual.				

	<p><b>50 – Death:</b> On the balance of probabilities, death was caused or brought forward in the short term by the incident.</p> <p><b>51 - Serious Sexual Safety Event:</b> The harm has resulted from a serious sexual safety event; defined as sexual safety events where:</p> <p style="padding-left: 40px;">Major harm (psychological and/or physical) has occurred. For example, a serious sexual assault such as suspected or alleged rape (as defined by the Crimes Act) or statutory rape (illegal sexual activity between an adult and a minor).</p> <p style="padding-left: 40px;">Sexual safety incidents that result in pregnancy.</p> <p><b>52– Severe:</b> The individual has or is likely to experience a permanent or temporary significant lessening in functioning, including impairment, disability or a shortened life expectancy as a result of the incident.</p> <p><b>53 – Moderate:</b> The individual's level of health, function or emotional wellbeing was or is likely to be affected because of the incident.</p> <p><b>54 – Minor:</b> The individual's level of health, function or emotional wellbeing was or is likely to be temporarily affected as a result of the incident which is likely to resolve without change to acuity of care or via invasive treatment.</p> <p><b>55 - No Harm</b></p>
<b>Validations</b>	<i>Level of harm clinical</i> is mandatory for all new clinical incidents at first transmission.
<b>Related Elements</b>	<i>Incident type</i> <i>Duration of harm</i> <i>Level of care/treatment required.</i> <i>Date closed</i>
<b>Administration</b>	
<b>Purpose</b>	This is one of three questions used to determine the Incident Severity Rating (ISR) for clinical incidents. See <a href="#">ISR in Section 2</a> .
<b>Principal Data Users</b>	Safer Care Victoria and Department of Health

## Duration of harm (NEW)

### Section 3 Data definitions

#### Duration of harm (New)

<b>Specifications</b>
-----------------------

<b>Definition</b>	An indication of the expected duration of harm that has resulted from the reported incident.				
<b>Form</b>	Identifier code	Repeats:	Min	Max	Duplicate
			1	1	N/A
<b>Layout</b>	XX (1-226)	Size	Min	Max	
			1	226	
<b>Reported by</b>	All Victorian public health services and all services under their governance structure including community health and bush nursing centres.				
<b>Reported For</b>	Clinical incidents records.				
<b>Reported When</b>	Reported at transmission of new incident. Can be amended through the process of incident review until closure.				
<b>Code set</b>	56 - Permanent 57 - Temporary				
<b>Reporting Guide</b>	<p>Only reported for clinical incident records when <i>Level of Harm</i> is reported as <b>Severe, Moderate or Minor</b>.</p> <p>Duration of harm is defined as follows:</p> <p><b>56 - Permanent</b> The harm the individual experienced is, or is most likely to be, permanent.</p> <p><b>57 - Temporary</b> The harm the individual experienced is, or is most likely to be, temporary.</p> <p>Comprehensive clinical guidance on reporting ISR elements is provided in the VHIMS Data Manual.</p>				
<b>Validations</b>	<i>Duration of harm</i> is mandatory for all new clinical incidents at first transmission.				
<b>Related Elements</b>	<i>Incident type</i> <i>Level of harm clinical</i> <i>Level of care/treatment required.</i> <i>Date closed</i>				
<b>Administration</b>					
<b>Purpose</b>	This is one of three questions used to determine the Incident Severity Rating (ISR) for clinical incidents. See <a href="#">ISR in Section 2</a> .				
<b>Principal Data Users</b>	Safer Care Victoria and Department of Health				
<b>Collection Start</b>	2024–25				
<b>Definition Source</b>	Department of Health				
<b>Code Set Source</b>	Department of Health				

## Level of care/treatment required (NEW)

### Section 3 Data definitions

#### Level of care/treatment required (New)

Specifications					
<b>Definition</b>	Indication of the level of care/treatment provided to the patient as a result of the incident, generally this will be care/treatment that would not have been required if the incident had not occurred.				
<b>Form</b>	Identifier code	Repeats:	Min	Max	Duplicate
			1	1	N/A
<b>Layout</b>	XX (1-226)	Size	Min	Max	
			1	226	
<b>Reported by</b>	All Victorian public health services and all services under their governance structure including community health and bush nursing centres.				
<b>Reported For</b>	Clinical incident records				
<b>Reported When</b>	Reported at transmission of new incident. Can be amended through the process of incident review until closure.				
<b>Code set</b>	58 - Advanced 59 - Intermediate 60 - Minor 61 – No additional treatment/care				
<b>Reporting Guide</b>	<p><b>Only reported for clinical incident records.</b></p> <p>Reported for records where <i>Duration of Harm</i> is reported as <b>Temporary</b>.</p> <p>Level of Care/Treatment is defined as follows:</p> <p><b>58 - Advanced</b> Life-saving care or treatment, intensive care unit, major surgical or medical intervention, high dependency psychiatric care, long term care or other high acuity specialist care, or a change to the individual's goals of care, that would not have otherwise been required if the incident had not occurred.</p> <p><b>59 - Intermediate</b> Surgical or medical intervention, psychiatric or psychological care, extended medium term care, therapeutic intervention, invasive diagnostics, increased length of stay greater than 72 hrs, referral to additional care team/s (including emergency department) for treatment exceeding assessment or single occasion treatment, or an increase in acuity of hospital care beyond increased monitoring and observations that would not have otherwise been required if the incident had not occurred.</p> <p><b>60 Minor</b> First aid, minor therapeutic interventions, increased monitoring or observations, minor or one occasion counselling or psychological support, non-invasive diagnostics, or referral to additional care team/s (including</p>				

	<p>emergency department) for assessment or single occasion treatment that would not have otherwise been required if the incident had not occurred.</p> <p><b>61 - None</b> No additional treatment or care was required besides an initial review to establish if the individual was harmed.</p> <p>Comprehensive clinical guidance on reporting ISR elements is provided in the VHIMS Data Manual.</p>
<b>Validations</b>	<i>Level of treatment/care</i> is mandatory for all new clinical incidents at first transmission.
<b>Related Elements</b>	<p><i>Incident type</i></p> <p><i>Level of harm clinical</i></p> <p><i>Duration of harm</i></p>
<b>Administration</b>	
<b>Purpose</b>	This is one of three questions used to determine the Incident Severity Rating for clinical incidents. See <a href="#">ISR in Section 2</a>

## Contributing factors (AMEND)

### Section 3 Data definitions

#### Contributing factors (Amend)

Specifications				
<b>Definition</b>	A circumstance, an action or other factor identified through incident review and analysis, as having contributed to, or increased the risk of, the incident.			
<b>Form</b>	Identifier code	Repeats:	Min	Max
			1	1
		Duplicate		Yes
<b>Layout</b>	XX (1-226)	Size	Min	Max
			1	226
<b>Reported by</b>	All Victorian public health services and all services under their governance structure including community health and bush nursing centres.			
<b>Reported For</b>	For all incidents with an ISR of 1 or 2.			
<b>Reported When</b>	Reported at any time in process of incident review.			
<b>Code set</b>	See <i>Contributing factors</i> code list (Section 7: Code set list)			

<b>Reporting Guide</b>	Select from the list of contributing factors. Multiple contributing factors can be selected.
<b>Validations</b>	<i>Contributing factors</i> are mandatory where <i>ISR</i> is 1 or 2 and <i>Date closed</i> is present.
<b>Related Elements</b>	<i>ISR (derived)</i> <i>Date closed.</i>
<b>Administration</b>	
<b>Purpose</b>	Enables identification of factors that contributed to the incident to support incident review, analysis, monitoring and reporting.

<b>Collection Start</b>	2024-25
<b>Definition Source</b>	Department of Health
<b>Code Set Source</b>	Department of Health

## Sentinel event (AMEND)

### Section 3 Data definitions

#### Sentinel Event (Amend)

Specifications					
<b>Definition</b>	An identifier that a clinical incident is a sentinel event.				
<b>Form</b>	Identifier code	Repeats:	Min	Max	Duplicate
			1	1	N/A
<b>Layout</b>	X	Size	Min	Max	
			1	1	
<b>Reported by</b>	All Victorian public health services and all services under their governance structure including community health and bush nursing centres.				
<b>Reported For</b>	Clinical Incidents <i>ISR</i> is 1 or 2.				
<b>Reported When</b>	Reported at any time in process of incident review.				
<b>Code set</b>	1 - Not a sentinel event 2 - Surgery or other invasive procedure performed on the wrong site resulting in serious harm or death. 3 – Wrong surgical or other invasive procedure performed on a patient resulting in serious harm or death. 4 - Unintended retention of a foreign object in a patient after surgery or other invasive procedure resulting in serious harm or death. 5 - Haemolytic blood transfusion reaction resulting from ABO incompatibility resulting in serious harm or death.				

	6 - Suspected suicide of a patient in an acute psychiatric unit or acute psychiatric ward. 7 - Medication error resulting in serious harm or death. 8 - Use of physical or mechanical restraint resulting in serious harm or death. 9 - Discharge or release of an infant or child to an unauthorised person. 10 - Use of an incorrectly positioned oro- or naso- gastric tube resulting in serious harm or death. 11 - All other adverse patient safety events resulting in serious harm or death.		
<b>Reporting Guide</b>	Single response only. Report the most appropriate category. The Victorian sentinel events guide (2019) is available at: <a href="https://www.bettersafecare.vic.gov.au/publications/sentinel-events-guide">https://www.bettersafecare.vic.gov.au/publications/sentinel-events-guide</a>		
<b>Validations</b>	Sentinel event is mandatory for all clinical incidents with an ISR is 1 or 2 when <i>Date closed</i> is present.		
<b>Related Elements</b>	<i>Incident type</i> <i>ISR (Derived)</i> <i>Date closed.</i>		
<b>Administration</b>			
<b>Purpose</b>	Enables reconciliation with Sentinel event reporting.		
<b>Principal Data Users</b>	Safer Care Victoria and Department of Health		
<b>Collection Start</b>	2019–20		
<b>Version History</b>	Version	Previous Name	Effective Date

## Indigenous status (NEW)

### Section 3 Data definitions

#### Indigenous status (New)

Specifications				
<b>Definition</b>	Identifier that the affected person identifies as Aboriginal and/or Torres Strait Islander.			
<b>Form</b>	Identifier code	Repeats:	Min	Max
			1	1
<b>Layout</b>	X	Size	Min	Max
			1	1
<b>Reported by</b>	All Victorian public health services and all services under their governance structure including community health and bush nursing centres.			
<b>Reported For</b>	Clinical incident records where a patient Client ID/UR Number is entered.			
<b>Reported When</b>	Reported at transmission of new incident.			
<b>Code set</b>	1 Aboriginal but not Torres Strait Islander origin 2 Torres Strait Islander but not Aboriginal origin 3 Both Aboriginal and Torres Strait Islander origin 4 Neither Aboriginal or Torres Strait Islander origin 8 Question unable to be asked. 9 Patient refused to answer.			

<b>Reporting Guide</b>	<p><b>Code 8 Question unable to be asked</b> should only be used under the following circumstances:</p> <ul style="list-style-type: none"> <li>When the patient's medical condition prevents the question of Indigenous Status being asked; or</li> <li>In the case of an unaccompanied child who is too young to be asked their Indigenous Status.</li> </ul> <p><b>Collect for every clinical incident.</b></p> <p>This information must be collected for every clinical incident. Systems must not be set up to input a default code</p>
<b>Validations</b>	<i>Indigenous status</i> is mandatory for all clinical incidents where a Patient UR is present at first transmission.
<b>Related Elements</b>	<p><i>Client ID/UR number</i></p> <p><i>Incident type</i></p> <p><i>Date closed</i></p>
<b>Administration</b>	
<b>Purpose</b>	Enables demographic analysis and trend analysis of reported incidents.
<b>Principal Data Users</b>	Safer Care Victoria and Department of Health
<b>Collection Start</b>	2024–25

## Is VMIA Notifiable?

### Section 3 Data definitions

#### Is VMIA Notifiable?

<b>Specifications</b>	
<b>Definition</b>	Incidents that meet criteria for notification to the Victorian Managed Insurance Authority (VMIA).
<b>Form</b>	Code
<b>Reported by</b>	All Victorian public health services and all services under their governance structure including community health and bush nursing centres.
<b>Reported For</b>	All incidents (clinical and OH&S), near misses and hazards.
<b>Reported When</b>	All clinical incidents when a patient Client ID/UR Number is entered
<b>Code set</b>	Yes No
<b>Reporting Guide</b>	<p>Select Yes if the incident meets criteria for notification to VMIA.</p> <p>Select No if this incident does not meet criteria for notification to VMIA.</p> <p>It is important to notify VMIA of any health care incident, occurrence, complaint, investigation, inquiry, or disciplinary proceeding which may give</p>

	rise to a medical indemnity claim, or if a request for compensation for personal injury, arising directly out of a health care incident, is received. Contact VMIA: <a href="https://www.vmia.vic.gov.au/about-us/contact-us">https://www.vmia.vic.gov.au/about-us/contact-us</a> This information must be collected for every clinical incident.
<b>Validations</b>	General edits only,
<b>Related Elements</b>	N/A
<b>Administration</b>	
<b>Purpose</b>	Enables identification of how many incidents resulted in a VMIA notifiable event, and aligns with the inclusion of the data item 'Is this a WorkSafe notifiable event?'

## Section 7 Code Set Lists

Section 7 in the VHIMS MDS manual will include all large value lists. For these specifications, the list changes that are related to new and amended items are included.

### 1. Large Value list Ward/Location Type, Specialty Unit Type

Section 7 VHIMS  
MDS Large Value List:

### 2. Event Type Taxonomy Changes

The attached spreadsheet includes the required changes, note there are three tabs each related to different incident types.

#5.2-ItemsChanges  
List\_Amended 23052

### 3. Contributing Factors

<b>Contributing Factors</b>	
<b>Communication</b>	
communicationdelayed	Communication delayed
communicationnotconducted	Communication not conducted
inaccurateinformationcommunicated	Inaccurate information communicated
inappropriatecommunication	Inappropriate communication
incompletecommunication	Incomplete communication
<b>Documentation</b>	
breachofprivacy	Breach of privacy
delayinaccessingdocument	Delay in accessing a document
illegible	Illegible
inadequatedocumentation	Inadequate documentation
incompletedocumentation	Incomplete documentation
missing/unavailabledocumentation	Missing/Unavailable documentation
unclear/ambiguous	Unclear/Ambiguous
<b>Equipment</b>	
equipmentfailed	Equipment failed

equipmentnotusedwhenindicated	Equipment not used when indicated
equipmentnotworking	Equipment not working
equipmentsuitabilityforpurpose	Equipment suitability for purpose
equipmentunavailable/inaccessible	Equipment unavailable/inaccessible
equipmentunfamiliar	Equipment unfamiliar
equipmentusability	Equipment usability
<b>Patient Factors</b>	
patientco-morbidities	Patient factors – co-morbidities
Patientmedicalhistory	Patient factors – medical history
patientinattention/distraction	Patient factors - inattention/distraction
patientlanguage	Patient factors - language
patientliteracy/comprehension	Patient factors - literacy/comprehension
patientphysicalcondition	Patient factors - physical condition
patientsocialhistory	Patient factors - social history
patientknowlege/skills	Patient factors - knowledge/skills
patientfatigue	Patient factors - fatigue
<b>Physical Environment Work environment factors (physical)</b>	
environmentnotmatchedtotaskorpatient/client/resident	Environment not matched to task or patient/client/resident
environmentlayoutnotsupportingworkflow	Environment layout not supporting workflow
lighting	Lighting
noise	Noise
overcrowding	Overcrowding
temperature	Temperature
unsafefloor	Unsafe floor
alarmfatigue	Alarm fatigue
<b>Policies/Decision Support Organisation and management factors</b>	
couldnotlocatepolicy/guideline	Could not locate policy/guideline
decisionsupportnotused	Decision support not used
decisionsupportunavailable	Decision support unavailable
norelevantpolicy/guidelinetofollow	No relevant policy/guideline to follow
policy/guidelineavailabilityunknown	Policy/guideline availability unknown
policy/guidelinenotcurrentbestpractice	Policy/guideline not current best practice

<del>policy/guidelinenotfollowed</del>	<del>Policy/guideline not followed</del>
policy/guidelinenotyeyetimplemented	Policy/guideline not yet implemented
policy/guidelineusedbutnotuseful	Policy/guideline used but not useful
financialresourceandconstraints	Financial resources and constraints
organisationalstructure	Organisational structure
decisionsupportusedbutnotuseful	Decision support used but not useful
safetyculture	Safety culture
<b>Relative/Visitor Factors</b>	
relativevisitorinattention/distraction	Relative/Visitor factors - inattention/distraction
relativevisitorlanguage	Relative/Visitor factors - language
relativevisitorliteracy/comprehension	Relative/Visitor factors - literacy/comprehension
relativevisitorphysicalcondition	Relative/Visitor factors - physical condition
relativevisitorsocialhistory	Relative/Visitor factors - social history
<b>Teamwork</b>	
noidentifiedleader	No identified leader
nosenior/specialistsupportsought	No senior/specialist support sought
responsibilitiesnotclear	<del>Responsibilities not clear</del>
individualresponsibilitiesnotclear	Individual responsibilities not clear
staffnotsupervised	Staff not supervised
supervisioninadequate	Supervision inadequate
teamstructureinappropriate	Team structure inappropriate
teamstructureunclear	Team structure unclear
<b>Treatment &amp; Procedures</b>	
assessmentnotcompleted	Assessment not completed
diagnosisdelayed	Diagnosis delayed
diagnosismissed	Diagnosis missed
diagnosisnotestablished	Diagnosis not established
diagnosiswrong	Diagnosis wrong
inappropriatecareplan	Inappropriate care plan
incompletecareplan	Incomplete care plan
notfollowedpost-discharge	Not followed post-discharge
screeningnotcompleted	Screening not completed

testdelay	Test delay
testorderdelay	Test order delay
testresultsnotaccurate	Test results not accurate
testresultsnotavailable	Test results not available
testresultsnotcommunicated	Test results not communicated
testresultsnotreviewed/actioned	Test results not reviewed/actioned
testsinappropriate/outmoded	Tests inappropriate/outmoded
unabletoaccessappropriatelevel	Unable to access appropriate level
unabletoaccessattimerequired	Unable to access at a time required
unabletoaccessservice	Unable to access service
<b>Worker Staff factors</b>	
<del>workerco-morbidities</del>	<del>Worker factors – co-morbidities</del>
<b>workermedicalhistory</b>	<b>Worker factors - medical history</b>
workerinattention/distraction	Worker factors - inattention/distraction
knowledge/skills	Knowledge/skills
<b>workerknowledge/skills</b>	<b>Worker factors - knowledge/skills</b>
workerlanguage	Worker factors - language
workerliteracy/comprehension	Worker factors - literacy/comprehension
<del>workerphysicalcondition</del>	<del>Worker factors – physical condition</del>
<b>workerphysicalhistory</b>	<b>Worker factors - physical history</b>
workersocialhistory	Worker factors - social history
fatigue	Fatigue
<b>Work environmental factors (workforce) Workforce</b>	
Alarm	Inappropriate staff levels
inductionnotadequate	Induction not adequate
rostering/shiftpatterns	Rostering/shift patterns
skillgapnotrecognised	Skill gap not recognised
skillmix	Skill mix
timepressure	Time pressure
traininginadequate	Training inadequate
workingbeyondskilllevel	Working beyond skill level
workingoutsideexpertise	Working outside expertise
workload	Workload

governmentregulatorsandexternalinfluences	Government, regulators and external influences
linkswithexternalhealthservices	Links with external health services
economiccontext	Economic context
legislativecontext	Legislative context

#### 4. Clinical ISR Algorithm

Level of Harm	Duration of Harm	Level of Treatment / Care	ISR
Death	<i>null</i>	<i>null</i>	1
Serious Sexual Safety Event	<i>null</i>	<i>null</i>	1
Severe	Permanent	<i>null</i>	1
Severe	Temporary	Advanced	1
Severe	Temporary	Intermediate	2
Severe	Temporary	Minor	2
Severe	Temporary	No additional treatment/care	2
Moderate	Permanent	<i>null</i>	2
Moderate	Temporary	Advanced	2
Moderate	Temporary	Intermediate	2
Moderate	Temporary	Minor	3
Moderate	Temporary	No additional treatment/care	3
Minor	<i>null</i>	<i>null</i>	3
No Harm	<i>null</i>	<i>null</i>	4
